

Exclusive | Come April 1, here's how GST compliances are bound to change

Starting April 1, 2025, businesses will have to deal with stricter compliance, tighter security, and fewer loopholes to squeeze through. If you thought tax compliance was already complex, buckle up because GST is about to get even more "interesting."

According to experts and tax practitioners, businesses have already been informed about these changes and are likely to spring up new surprises and streamlining of compliances.

Sivakumar Ramjee, Executive Director- Indirect Tax, Nangia Andersen LLP, says, “ These changes aim to boost security and streamline compliance, but let’s be honest—they also make tax filings a little more trickier. So, update your systems, train your team, and maybe invest in a stress ball or two.”
